The following is an examiner's statement of reasons for allowance: The prior art does not teach a process of making a multi-layer printed wiring board including the step of exposing the solder resist material to an ultraviolet (UV) ray through the unexposed portion of the light shielding mask that does not absorb the UV ray and which light shielding mask is formed by irradiation of laser beam on a photosensitive film as the context of claim 1.

3. The closest prior art Schmidt et al (5,134,056) disclose a process for exposing solder resist material (5) by dissolving the irradiated portion (60) but do not teach exposing the resist material through the non-irradiated (unexposed) portion of the mask as claimed.
